

Section-1: What we were supposed to do.

1. Requirements gathering from client
2. Requirement analysis
3. Prioritising the requirements
4. Getting familiarised with Android Studio and App development
5. Starting the first Sprint

Section 2: What we did

1. Created user stories – Kartik
2. Creating the first Sprint- Kartik
3. Android Studio setup – by team
4. Started exploring Android studio and getting familiarised with different features – by team

Challenges faced:

1. Understanding the architecture of Android studio and exploring available features was bit difficult as some members are new to Android App development.

Section 3: What we will do

1. Explore Pin Security features for App – Madhu
2. Making the Team logo as App logo - Anitha
3. Design and document basic classes and app flow – Kartik
4. UML design documentation for the discussed design – Avinash
5. Explore other apps for getting Ideas of layout design - team

Section 4: Meeting with the TA/Client

1. Clarifications regarding Requirements gathered
2. Q&A regarding basic prototype
3. Client comment :
 - All the paragraphs texts need to be aligned between margins.
 - All the figures need not to be left aligned.
 - Texts size need to be adjusted.
